This image shows a highly textured, high-contrast black and white surface. The texture is dense and irregular, resembling a fine-grained material or a heavily patterned surface. A vertical strip of lighter, possibly white, material runs along the left edge, suggesting a binding or a hinge. The overall appearance is that of a close-up of a book cover or endpaper, with the texture becoming more pronounced towards the right side.

A black and white photograph showing a close-up of a textured surface, likely a rock or concrete. The surface is covered in a dense, granular pattern of small, light-colored spots or pits against a darker background. Near the top center, there is a dark, irregularly shaped object that appears to be a small animal or insect, possibly a bat, resting on the surface. The lighting is somewhat uneven, with brighter areas towards the top and darker areas towards the bottom.
